linkedin.com/in/eljo-hoxha-70915b279

TECHNICAL SKILLS

Languages

TypeScript; JavaScript (ES6+)

Frontend

React; React Native; Expo; Expo Router; Next.js; Vue.js; Vite

State Management

TanStack Query; Redux Toolkit; Zustand

Forms & Validation

React Hook Form; Zod; Vee Validate

UI & Styling

Tailwind CSS; Shadcn UI; Tamagui; Sass; Bootstrap

APIs & Backend Integration

REST APIs; GraphQL; Firebase Authentication; Firebase Cloud Messaging; Firebase Analytics

Mobile Development

Deep Linking; Push Notifications; Google Sign-In; Apple Sign-In; In-App Purchases; i18next Localization

DevOps & Deployment

Expo EAS; CI/CD; App Store Connect; Google Play Console; Environment Management

Architecture

Monorepo Architecture; White-label Applications; Design Systems; Reusable Component Libraries; Multi-tenant SaaS

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years of experience building scalable web and mobile applications using React, React Native, Expo, TypeScript, and modern frontend technologies. Proven track record of architecting production-ready SaaS platforms, leading large-scale application migrations, designing reusable component systems, and delivering cross-platform applications for iOS, Android, and Web.

Experienced with GraphQL, REST APIs, Firebase, Stripe, TanStack Query, and modern frontend architecture. Passionate about building maintainable software, improving developer experience, and mentoring engineers within Agile teams.

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer

ChamberedIn | Professional Networking & Community Platform
2026

Team: 1 Backend • 2 Frontend • 1 DevOps • 1 Manager • 1 QA

- Developed production features for a community and chamber management platform built with Expo React Native.
- Implemented paid event booking workflows with configurable dates, time slots, and Google Calendar integration.
- Built refund management and subscription transaction workflows.
- Developed event agenda and calendar management features.
- Implemented role-based event management for organizations.
- Built transaction history and subscription management screens.
- Implemented iOS Glass UI for a modern native experience.
- Integrated GraphQL APIs with optimized client-side data handling.

Technologies: React Native, Expo, GraphQL, Stripe, TypeScript

Senior Frontend Engineer

One Home Solution | Construction Services Platform
2025 – 2026

Team: 2 Backend • 2 Frontend • 1 DevOps • 1 Manager • 1 QA

- Contributed to an Expo monorepo supporting multiple applications.
- Built and supported the Admin web platform in React as the frontend owner for that surface.
- Supported technician and client applications across mobile and web using Expo React Native.
- Upgraded the platform from Expo SDK 51 to SDK 53 while resolving breaking library changes.
- Developed AI-powered service estimation and booking workflows.
- Refactored complex multi-step modals into reusable components.
- Increased code reuse across multiple application flows.
- Resolved production issues and improved application stability.

Technologies: React, Expo, React Native, TypeScript, Monorepo

Professional Experience

Senior Frontend Engineer • React Native • SaaS Platforms

CORE STRENGTHS

- Architecture**
Frontend foundations, migrations, monorepos, white-label systems, reusable component systems.
- Delivery**
Production features, mobile releases, OTA updates, environment management, Agile collaboration.
- Mentorship**
Junior frontend mentoring, code quality, developer experience, team enablement.

PROFESSIONAL EXPERIENCE

- Senior Frontend Engineer**
Power of Two (POF2) | MLM Digital Marketplace
2025
Team: 1 Backend • 2 Frontend • 1 DevOps • 1 Manager • 1 QA
 - Architected the frontend foundation for both Admin Portal and Customer applications.
 - Designed reusable layouts, components, and scalable project architecture.
 - Mentored a junior frontend developer.
 - Built cross-platform mobile and web applications.
 - Managed development, staging, and production environments.
 - Controlled release workflows and OTA updates using Expo EAS.
 - Integrated Stripe payments and push notifications.
 - Built scalable state management using TanStack Query and Zustand.**Admin Stack:** React, TypeScript, Vite, TanStack Router, TanStack Query, Zustand, Zod, React Hook Form, Tailwind CSS, Shadcn UI
Mobile Stack: Expo, React Native, Tamagui, Expo Router, TanStack Query, Zustand, React Hook Form, Zod
- Senior React Native Engineer**
Pulse Access | Fitness Platform
2024
Team: 1 Manager • 1 QA
 - Led migration from React Native CLI to Expo.
 - Redesigned application architecture for scalability and maintainability.
 - Implemented Expo Router with file-based navigation.
 - Built a white-label architecture supporting multiple branded applications.
 - Created JSON-driven configuration for themes and assets.
 - Replaced Axios with a centralized API layer.
 - Introduced TanStack Query for efficient server-state management.
 - Organized the project into reusable modules including hooks, APIs, stores, components, utilities, and types.
 - Reduced development time by approximately 3× through improved architecture.
 - Diagnosed backend notification issues by identifying API errors (HTTP 403/500), helping resolve production integration problems.**Technologies:** Expo, React Native, TypeScript, TanStack Query, Firebase, Expo EAS
- Frontend Engineer**
N-OV8 | AI SaaS Platform
2024 – 2025
Team: 1 Backend • 2 Frontend • 1 Manager • 1 QA
 - Established the frontend technology stack after learning Vue.js.
 - Designed the application architecture before backend integration.
 - Mentored a junior frontend developer.
 - Built reusable UI components with Shadcn UI.
 - Developed role-based and subscription-based access control.
 - Built a Super Admin dashboard.
 - Implemented dark/light theme support.
 - Improved frontend performance through TanStack Query caching strategies.**Technologies:** Vue.js, Vite, Tailwind CSS, Pinia, Vue Router, Zod, Vee Validate

EDUCATION

Bachelor of Computer Engineering
Universiteti Mesdhetar i Shqipërisë
2023 – 2026

LANGUAGES

- Albanian — Native
- English — Professional Working Proficiency

Frontend Developer

Motomtech Platform

2023 – 2024

Team: 2 Backend • 3 Frontend • Team Lead • 1 DevOps • 1 Manager • 1 QA

- Built frontend architecture before backend APIs using mock data.
- Designed reusable layouts and shared UI components.
- Created routing and scalable project structure.
- Developed modules including: Client Management; Employee Management; Role Permissions; Project Assignment; Meeting Scheduling; Dynamic Service Plans; Super Admin Dashboard.

Technologies: React, TypeScript, TanStack Router, TanStack Query, Zustand, Zod, React Hook Form, Tailwind CSS, Shadcn UI

React Native Developer

KidsPod | Audio Streaming Platform

2023 – 2024

Team: 1 Backend • 1 Mobile • 1 DevOps • 1 Manager • 1 QA

- Developed production features for an audio streaming application.
- Implemented playlist creation and offline downloads.
- Enabled background audio playback on iOS and Android.
- Integrated Google Sign-In and Apple Sign-In using Firebase Authentication.
- Implemented subscription payments with react-native-iap.
- Improved navigation architecture and overall application performance.
- Resolved offline synchronization issues.
- Managed App Store and Google Play releases.

Technologies: React Native CLI, Firebase, TanStack Query, In-App Purchases

React / React Native Developer

Poro | Food Delivery Platform

2022 – 2024

Team: 1 Frontend • 1 Backend • 1 DevOps • 1 Manager • 1 QA

Started as a Mobile Developer and progressively became responsible for both web and mobile frontend development.

Key Contributions

- Redesigned client and delivery driver application interfaces.
- Built restaurant and food search functionality.
- Integrated Google Maps and geolocation.
- Implemented multilingual support.
- Developed live order tracking.
- Added ratings and reviews.
- Built delivery driver order management and earnings dashboards.
- Refactored global state management using Redux.
- Integrated push notifications with deep-link navigation.
- Participated in App Store and Google Play release processes.

Apps: Client; Delivery Driver | Web: Restaurant; Super Admin; Landing Page

Frontend Intern

Motomtech Platform

September 2021 – September 2022

- Completed a one-year frontend internship focused on building practical web and mobile development foundations.
- Spent 4 months deeply learning HTML, CSS, Bootstrap, and Sass, then 3 months strengthening JavaScript fundamentals.
- Learned React Native basics for 1 month before joining a real project environment.
- Supported small production tasks including API declarations, UI fixes, and route additions before progressing into a Junior Frontend Developer role.

Technologies: HTML, CSS, Bootstrap, Sass, JavaScript, React Native
